Wood Gasoline Gas Machine

INTERIOR OF MACHINE

The above photo-engraving represents the "Wood" Gasoline Gas Machine, with the door removed so as to show the interior arrangement of the same.

Price, without tank or pump, \$25

ANNOUNCEMENT

IN presenting the "*Wood Gasoline Gas Machine*" to the consideration of the public, we desire only to call your attention to its simple mechanism and the testimonials of some few of those who have used it. You can then judge for yourself of its merits and demerits. No proof of good service is so satisfactory as the voice and good will of those who have enjoyed it.

Our home town, a city of 6000 people, has thirty-seven of our plants, and there are over 500 of them in use within a radius of sixty miles of Litchfield. Our best friends are those who know us best. We trust you will find the following pages of interest to you.

Respectfully,

LITCHFIELD LAMP MFG. CO.
Litchfield, Illinois

The Questions You Will Ask Yourself

About our plant will relate no doubt to :

Its Safety
Its Brilliancy of Light
Its Earning Power in Dollars Saved
Its Simplicity
Our Guarantee.

The following pages will briefly answer your questions.

Safety

Is the first consideration in all things. From an examination of our machine (see cut on inside of back cover), you will note that the gasoline passes from the tank into the generator through a hollow wire. The tank can be removed as far from the generator as may be desired, and may be placed in the attic, the basement or an adjoining room.

There has not been a single accident from explosion or otherwise with our machine, though thousands of them are in use, and it is a *physical impossibility* for an explosion or other catastrophe to happen except as the result of willful intention and purpose.

A Dollar Saved is a Dollar Made

And nothing runs so fast into profits as cutting down expenses. The saving by use of our machine will depend on the cost of gasoline and the price of gas or electricity in each particular community. If you are using gas or electricity, it will save from 35 to 75 per cent always, as we burn 95 parts of air to 5 parts of gasoline. You can figure for yourself what the saving will be in your case by the following :

One gallon of gasoline will burn one 500 candle power light thirty two hours or four such lights eight hours. Knowing the price of gasoline in your community, you can easily compare the cost with your present light bill. We refer your attention to the letters from our patrons on this subject.

The Best Substitute for Sunlight

Has been found in the steady, soft, brilliant light of the *Wood Gasoline Gas Machine*. It is pleasing and restful to the eyes and by it you can distinguish the different colors of fabrics as readily as by

daylight. No store or room lighted by our system can fail to attract attention and one light in front of your store is worth more as an advertisement than the cost of an entire plant.

Our light is especially suited to Stores, Halls, Churches, Lodge Rooms, Hotels, Banks, Warehouses, Bowling Alleys and Billiard Rooms.

The Simplicity of Construction

And operation of our machine is apparent from an examination of the skeleton cut of our generator on the opposite page. There is nothing to get out of order and a child can understand it.

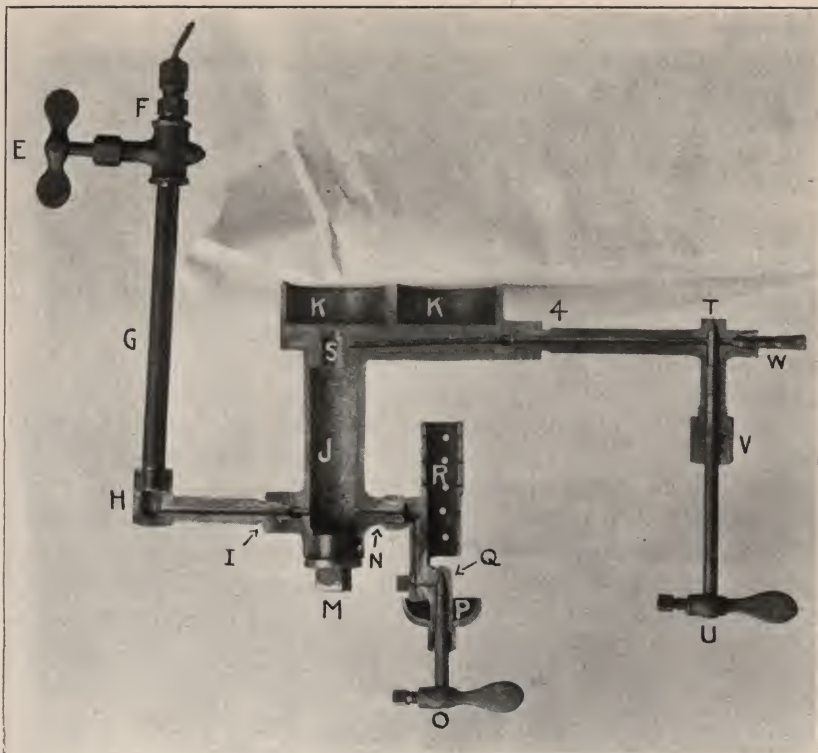

One of the greatest advantages it has over other gas machines, is this very simplicity and the ease with which it can be cleaned.

Following this cut you will note that the gasoline passes through wire which leads from the tank and is let into pipe G by opening valve E, then passes through H to reservoir J. You will also note that in reservoir J, there is a large opening free from packing. It is in this reservoir that gasoline is generated into gas and passes out through opening at S and out at T after opening valve U, where it mixes with the air and goes into pipe leading to the lights.

It is a fact that all gasoline gas machines will need cleaning sooner or later and the mechanism is so complicated in most machines that when they do need cleaning, they have to be sent in to the factory, causing the purchaser not only to be without light for several days, but in addition to stand the expense of freight or express.

In our plant you can see from cut there is only one possible place to clog, that is the opening running from S to W. This hole is $\frac{1}{8}$ of an inch in diameter and can be cleaned in two minutes by running through opening, beginning at W, going through to S, the steel drill which is used as a pin to hold the door on hinges.

We have machines which have been in use for three years and have not found it necessary to clean them, but on account of inferior gasoline, it is sometimes found advisable to clean them oftener as it is no trouble and can be done in a few minutes. We recommend that it be cleaned every six or eight months so as always to insure a brilliant light.

To Clean Machine

1. See that some pressure is in tank, then shut off valve E.
2. Screw out plug W and valve stem U; before screwing out stem U, screw down packing box V so as to leave it on stem U.
3. Take drill which you will find used as a pin to hold door on hinges and run through opening, starting at point W to point S, at the same time turning this drill so as to loosen what dirt or sediment may have accumulated in this opening.
4. Open up valve E letting the gasoline run through machine catching it in a cup at openings W and V. Let this run through until the gasoline becomes clear. Then place fingers over openings at W and V, thus forcing the gasoline through point T.
5. Scrape off all dirt or sediment that may be formed on stem U. Screw back plug W and stem U.
6. You will note that stem U has a triple thread. In replacing be sure to strike the right thread so lever will stand in right position, then tighten up packing box V so that it will not leak.
7. The tank should be emptied and thoroughly rinsed out with gasoline every five or six months so as to remove all dirt or sediment that accumulates through the use of inferior gasoline.
8. We recommend that all gasoline be strained through a woolen cloth so as to prevent any dirt or coal oil that may be in gasoline going into tank.

**Our Guarantee Covers a Longer Period Than That of
Any Other Lighting Plant**

And goes with every machine installed. We see no reason why, under careful operation, the machine should not last a lifetime. We know our workmanship and material are the very best and we do not hesitate to guarantee our machine as per the following:

ABSOLUTE GUARANTEE

WE GUARANTEE that the material and workmanship of the
Wood Gasoline Gas Machine,

purchased by _____, this day,
is first-class in every respect, and we will make good, by repairs or replacement, any imperfection or defect.

WE ALSO GUARANTEE that this generator is capable of producing a brilliant white light, and, under careful operation, will give entire satisfaction for five years from this date.

Litchfield Lamp Mfg. Co.

Litchfield, Ill. _____ *190* _____

Condensed Price List

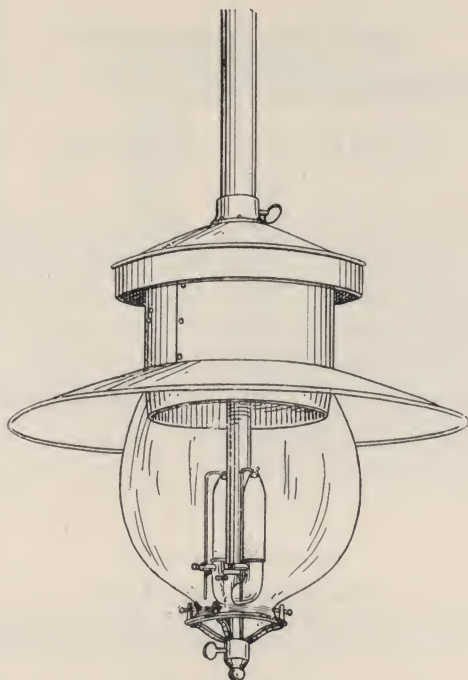

Wood Gasoline Gas Machine, with tank and pump complete, \$35.00

Fixtures

Suitable for Churches, Halls, Lodge Rooms, etc.

This is a beautiful and durable fixture, made of best polished brass, lacquered or oxidized finish, with clear or opal globes.

Price, complete, \$25 to \$40, according to ornamentation

Saved \$15 a Month

LITCHFIELD, ILL., October 16, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

GENTLEMEN:—About three years ago you installed for us one of your lighting plants at a cost of \$125. Prior to that time we used gas and electricity, which cost us an average of \$20 per month. Your system furnishes much more and better light, etc., and costs us less than \$5 per month. In three years we have saved \$15 a month in our lighting bill, or a total of \$540. Our saving each year has been, therefore, \$180 or \$65 more than the entire cost of your plant. The plant is still giving as good service as in the beginning. In addition to this the satisfaction and advertising derived from having a perfectly lighted store are of inestimable value and it gives us pleasure to commend your excellent system.

• Very truly yours,

UNION CLOTHING CO.

Best Light For The Money

EDWARDSVILLE, ILL., June 26, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

GENTLEMEN:—We have been using your system for lighting our store for over a year and during this time it has given entire satisfaction both in quality of light and in cost of same.

We are using twelve arc lights in our three rooms of 110 feet long each. The cost of running same is not more than 10 cents per hour.

We cheerfully recommend this system to anyone who is wishing the best light for the money.

Respectfully,

PALACE STORE CO.

Best in Town

CHAPIN, ILL., October 25, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

DEAR SIR:—I wish to say that the Wood Gasoline Gas Machine that was bought of you some time ago gives entire satisfaction and have by far the best lights in our town. The last one ordered is now here and you will please send a man to install same and oblige,

Yours respectfully,

J. W. BROCKHOUSE.

Electric Lights Not In It

LENOX, IOWA, July 9, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

GENTLEMEN:—I used the lights in store and opera house the night of July 4th until two o'clock in the morning and they worked fine. They are certainly a success. Our electric lights are not in it in appearance or cheapness.

Respectfully,

H. A. CHILDS.

No Repairs Necessary

GREENFIELD, ILL., October 25, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

DEAR SIRs;—It gives us great pleasure to say a few words of praise for your light system. I put in my plant April 1st, 1904, and have run it continually ever since without one cent of repairs. I find they cost me about half of what I had paid for electric lights and get better light. We have put in thirteen other plants and they are all giving *the best* of satisfaction.

Yours truly,

J. B. BRODMARKLE,

Per W. T. Parish.

Costs Seven Cents a Night

SMITHFIELD, ILL., July 20, 1905.

LITCHFIELD LIGHTING CO., Litchfield, Ill.

GENTLEMEN:—I still like this plant. I have looked at different kinds and I believe I can demonstrate the fact that I can get more light with the least oil of any plant that I have looked at up to this time. I can run my plant at a cost of seven to eight cents per night. My room is 40x60 feet. If any of the manufacturers can beat that let them trot them out.

Yours respectfully,

C. K. PARVIN.

Best and Cheapest

SPRINGFIELD, ILL., October 30, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

GENTLEMEN:—I have had one of your lighting plants for over four years. It has been in constant use all that time and it is working as well today as the day it was installed. I am well pleased and I think it is the best and cheapest light on the market, and can cheerfully recommend this system to anyone who has a business house to light.

Very truly yours,

PADDY WILLIAMS.

Would Not Sell For Double The Price

COFFEEN, ILL., October 26, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

GENTLEMEN:—We have used the Wood Gasoline Gas Machine for four months and find that it is the most complete and economical light that we ever used. We have used gravity pressure gas lamps and used as high as four mantles a week. We are still using the same mantles that our plant was put up with. You could not buy our plant for twice the price and compel us to do without it.

Yours truly,

EDWARDS MERCANTILE CO.

General Merchandisers.

Very Simple

GRAND CHAIN, ILL., September 7, 1905.

LITCHFIELD GAS LAMP CO., Litchfield, Ill.

GENTLEMEN:—Having used your gasoline gas machine for about one year I have found it to be an excellent system, being very simple and not liable to get out of order, and making a beautiful light. Have recommended the lamp to Mr. Jacob Fellenstein, druggist, who is intending installing light in a new building. You will receive a letter of inquiry in a few days in regard to price, etc.

Yours very truly,

GUS CAIN.

Best Lights in Our City

GREENFIELD, Mo., October 25, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

DEAR SIR:—Enclosed you will please find check for \$25, balance due on your lighting plant installed with us some time ago. After a thorough test of your plant we are perfectly satisfied, hence we complete payment on the plant, feeling that we have the best lights in our city.

Yours truly,

HARRIS & UNDERWOOD.

John Harris, Prop. Postoffice Book Store.
R. P. Underwood, Postmaster.

Colors Easily Distinguished

HIGHLAND, ILL., October 24, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

GENTLEMEN:—It affords us much pleasure to recommend to our brother merchants the Wood System of Gasoline Gas Light for stores. The system is easily and very economically operated. We discarded electricity at 25 cents per 16 candle power lamp per month, and aside from getting a most perfect light by which colors can easily be distinguished, we have light when we want it, and save considerable in operating it over electricity.

Merchants in need of a perfect store light should see this system in operation, that will be more convincing than anything more we could say.

Yours very truly,

HIGHLAND STORE CO.

J. G. Bardill, Pres.

Four Years' Good Service

HILLSBORO, ILL., October 30, 1905.

LITCHFIELD LAMP MFG. CO., Litchfield, Ill.

GENTLEMEN:—After using your lights for four years can say they have given us entire satisfaction and we consider it the best system for lighting a business house we have ever seen.

Very truly,

JAMES L. MCDAVID.
